Objectives

Promote use of digital technologies for fulfilling regulatory requirements within the EU to reduce administrative burden and promote digitalisation in freight transport and logistics.

Acceptance by public authorities of freight transport information made available **electronically**

Cargo information required to prove compliance with conditions of transport in the EU

Uniform implementation of the obligation of **acceptance** by authorities

Alignment of digitalised processes for regulatory information checks/processing

Interoperability of the IT **systems** and **solutions** used

At a minimum, data (semantic) interoperability

A harmonised EU framework for business-to-authority electronic exchange of freight transport information.

Information (already) required by EU & MS legislation

- Legislation applicable to the transport of goods on the EU hinterland
- Legislation concerning the means of transport (certificates) and the personnel (licenses) not concerned

Obligation of all competent authorities in all EU MS

- To accept the information electronically
- To use the same requirements/technical specifications for acceptance

Option for the economic operators

- To present the information electronically
- But in harmonised format; should use certified eFTI platforms or service providers

Common requirements for service providers and platforms

- For platforms' functionalities and, respectively, service providers' obligations
- Implementation specifications to be adopted through secondary legislation

Harmonised third-party certification valid EU-wide

- One stop shop

eFTI Regulation in practice

National authority access point

Common eFTI data sets

Harmonised access procedures, rules and technical specifications

B2B e-information exchange

eFTI platform / certification

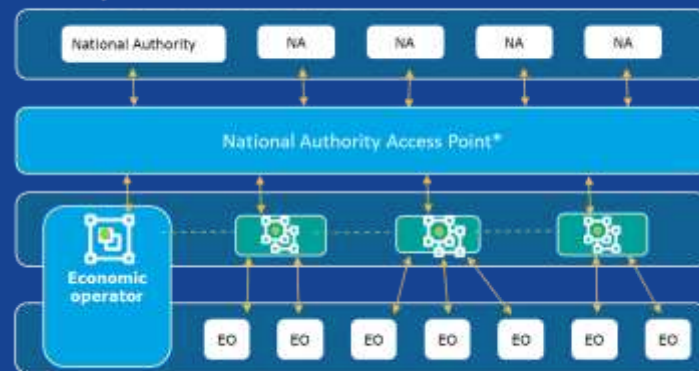

ICT systems:
Economic operators' own company system

eFTI service providers' platforms

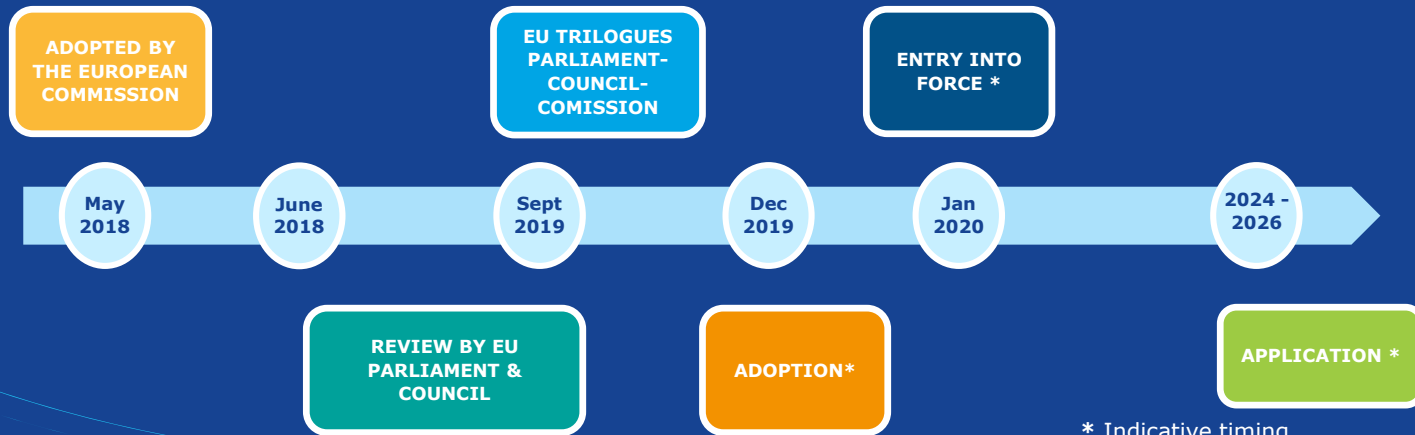

Conceptual architecture

* At MS level. Possible implementation, not mandated by the Regulation

From adoption to application

* Indicative timing
